

ch 17 from gene pdf

In biology, a gene is a sequence of DNA or RNA that codes for a molecule that has a function. During gene expression, the DNA is first copied into RNA. The RNA can be directly functional or be the intermediate template for a protein that performs a function.

Gene - Wikipedia

In the medicine field, gene therapy (also called human gene transfer) is the therapeutic delivery of nucleic acid into a patient's cells as a drug to treat disease. The first attempt at modifying human DNA was performed in 1980 by Martin Cline, but the first successful nuclear gene transfer in humans, approved by the National Institutes of ...

Gene therapy - Wikipedia

As the highest-ranked open access journal in its field, Genome Biology publishes outstanding research that advances the fields of biology and biomedicine from a genomic and post-genomic perspective.
