

chemistry topic 3 periodic pdf

A selective, annotated collection of the collection of the best Web links for students of General Chemistry.

General Chemistry for Students - Steve Lower's Web pages

Chemistry is the scientific discipline involved with compounds composed of atoms, i.e. elements, and molecules, i.e. combinations of atoms: their composition, structure, properties, behavior and the changes they undergo during a reaction with other compounds. Chemistry addresses topics such as how atoms and molecules interact via chemical bonds to form new chemical compounds.

Chemistry - Wikipedia

Relativistic quantum chemistry combines relativistic mechanics with quantum chemistry to explain elemental properties and structure, especially for the heavier elements of the periodic table. A prominent example of such an explanation is the color of gold: due to relativistic effects, it is not silvery like most other metals.. The term relativistic effects was developed in light of the history ...
