Tips covering only connection pooling with JDBC. The primary tip, repeated again and again, is to use connection pooling. Secondary tips include

JDBC connection pooling tips. - Java performance

A Java virtual machine (JVM) is a virtual machine that enables a computer to run Java programs as well as programs written in other languages and compiled to Java bytecode. The JVM is detailed by a specification that formally describes what is required of a JVM implementation. Having a specification ensures interoperability of Java programs across different implementations so that program ...
