

nervous system ii anatomy pdf

The nervous system is the part of an animal that coordinates its actions by transmitting signals to and from different parts of its body. The nervous system detects environmental changes that impact the body, then works in tandem with the endocrine system to respond to such events.

Nervous system - Wikipedia

2. 2. Functions of the Nervous System. 1) Integration of body processes 2) Control of voluntary effectors (skeletal muscles), and mediation of voluntary reflexes.

Human Brain - Neuroscience - Cognitive Science

Classification of Brain Tumors. In 2000, the World Health Organization (WHO) revised the classification of

neoplasms affecting the central nervous system, based on a century-old premise that each type of tumor originated from one specific cell type. 2 Purely on the basis of histologic features, this classification system relies almost entirely ...
